PROFESSIONAL SUMMARY

Computer Science sophomore at CU Boulder College of Engineering and Applied Science with experience building a Python-based statistical model with a multi-API data pipeline, and a C++ terminal-based game with turn logic, menus, and random outcomes. Seeking software engineering, cybersecurity, AI, or data science opportunities.

EDUCATION

University of Colorado-Boulder – College of Engineering and Applied Science

Boulder, CO

Bachelor of Science, Computer Science. GPA: 3.838 / 4.00

Graduating May 2029

Relevant Coursework: CSCI 2270: Data Structures, CSCI 3308: Software Development, CSCI 2400: Computer Systems

PROJECTS

NHL Outcome Prediction Model

February 2026 – Present

- Built a statistical model in Python using domain-specific feature engineering (team defense ratings, home/away splits, back-to-back schedule effects), and a data pipeline using multiple APIs (odds markets, player stats, schedules) to predict NHL game and player stat outcomes
- Back-tested performance against sportsbook pricing across 280+ logged bets; identified a high-confidence segment achieving a 62%-win rate and positive return on investment

Terminal-Based DNA Sequencing Game

November 2025 – December 2025

- Developed a two-player, terminal-based game in C++ where players select a scientist with unique stats and race to meet the end goal first
- Implemented a turn-based system with a turn menu, a dye to roll, and randomized positive and negative events affecting player progress

ACTIVITIES + CERTIFICATIONS

CU Boulder Cybersecurity Club Member + ongoing certificate (resuming Fall 2026)

August 2025 – December 2025

- Completed hands-on training covering offensive and defensive strategies including OSINT and password hashing; configured ParrotOS and applied tools such as hash cat to practice password cracking methodologies in a controlled setting
- Google Cybersecurity Certificate (in progress, via Coursera) — network security, threat detection, and incident response

SKILLS

Programming Languages: C++, Java, Python

Tools & Concepts: GitHub, Data Structures, APIs, Binary/Bitwise Operations, Statistics, OSINT, Incident Response, Hashcat, Feature Engineering

WORK EXPERIENCE

Wheaton Park District

May 2024 – August 2024

Seasonal Trim Crew

May 2026 – August 2026

- Maintained turf, gardens, and public grounds across park district properties to ensure safe, visually appealing spaces for community use
- Collaborated with a crew of 5 to complete weekly maintenance across 30+ parks and facilities

Suzette's Crêperie

Busser

June 2023 – April 2025

Server

April 2025 - January 2026

- Provided attentive service in a fast-paced dining environment, handling guest requests, special accommodations, and complaints professionally
- Coordinated with kitchen staff and fellow servers to maintain smooth, efficient service flow
- Upsold menu items and shared detailed knowledge of dishes and pairings to enhance the customer experience
